

Floodplains, Streams and Wetlands

Compliance Workshop

Have you ever needed to conduct work in a stream, such as removing debris or adding fill material?

Have you been faced with constructing a bridge or culvert in or near wetlands or streams?

Have you ever wondered if you were working in a floodplain?

If you answered yes, then this workshop is designed for you!

What will be covered?

- Regulations and Permits
 - 401 Water Quality Certification, KY Division of Water
 - 404, U.S. Army Corp of Engineers
 - KYR10, Stormwater Construction, KY Division of Water
- In-Lieu Fees and Stream Mitigations
- Floodplain Identification
- What to Expect During An Inspection

Participants will leave knowing the basics of the programs, what questions to ask before beginning any project and who to contact. Participants will not become experts in the programs, but will gain a general overview in order to avoid regulatory compliance issues.
